Sublimation of Li@C₆₀

E.E.B. Campbell, H.J. Chandler, R. Schaub

Supplementary Information

Fig. S.1 Raman spectra of [Li⁺@C₆₀]PF₆⁻ material before and after heating. The heated material was removed from the oven and vacuum chamber after the measurement series referred to as “Li@C₆₀ 2nd” in the main manuscript.

Fig. S.2

MALDI FTICR mass spectra of the soluble component of the material removed from the oven after measurement series “Li@C₆₀ 2nd”. The material was ground up and sonicated in dichlorobenzene for 20 minutes before being filtered.
